Grandma's Remedy Still Good for Colds

Colds and other upper respiratory tract illnesses probably cause more discomfort and time lost from work or school than any other American health problem.

A cold is caused by one or more of many viruses, the American Medical Association reminds. Actually, grandma's remedy is still good. If you get a cold, stay home in bed. Keep warm. Gargle with warm salt water to ease a sore throat. Take a mild pain reliever for the discomfort.

None of this will cure the cold, but it will make you feel somewhat more comfortable while your body's natural defense mechanisms are building up enough steam to overcome the virus.

In some circles in recent years, massive doses of Vitamin C have been advanced as therapy or preventive for the cold. Physicians everywhere hoped it would work, but scientific studies thus far have failed to prove the usefulness of Vitamin C for colds.

Most of us have a cold or two during the course of the winter. Usually we try to keep going to the office, but sometimes we feel too bad to work, and spend a day or two at home.

There are medications now available—antihistamines, pain relievers, cough suppressants, and fever reducers—that can make the symptoms of a cold much less severe. These have their limitations and their problems. Antihistamines can cause drowsiness, which can be highly dangerous when driving an auto. If you get a cold, ask your doctor about the medications that reduce runny nose and sneezing and coughing.

As youngsters heard the old folks say: Treat a cold and cure it in two weeks; let it alone and it will go away in a fortnight. The time element isn't that exact, but the theory is the same.

Frostbite Is Hazard Of Winter Months

An ever present winter hazard in North America is frostbite.

Frostbite is, naturally, more of a problem in the northern states, but even in much of the South there are occasional nights cold enough to nip unprotected noses and cheeks.

Frostbite can be very painful, resulting in amputations, and can leave the victim hypersensitive to cold for the rest of his or her life.

In some ways the damage of frostbite is similar to a burn. First degree frostbite, like sunburn, is an injury to the surface skin. It is likely to attack ears, toes, fingers, cheeks or nose. Second degree frostbite produced blisters, as in second degree burns. In third degree frostbite the damage is deep and much of the frozen part may be lost.

The American Medical Association points out that prevention is the best protection against frostbite.

Prevention means being properly dressed in warm clothing, waterproof shoes, and heavy, dry socks, with good covering for head and ears. Keep clothing dry from both outside moisture and from perspiration, and avoid tight clothing or garters that may restrict circulation.

Motorists traveling across country in subfreezing weather are advised to have heavy clothing and shoes in the car, in the event of a breakdown and a necessary hike for help.

First signs of frostbite are a "pins and needles" prickly feeling, and then numbness. The affected part will turn white or grey and later red.

First aid possibilities are limited. Thawing of the tissue as soon as possible is the first consideration. This can best be accomplished by getting indoors into a warm room. Use warm water, not too hot. Treat tfe frozen part gently and do not rub or massage it. The old technique of rubbing snow or ice water on the frozen spot does more harm than good, by delaying thawing.

Winter Car Care Tips

To help keep your car running in cold weather without your getting hot under the collar because of unnecessary repair bills, here are some tips on car care:

1. Tune-up your engine. Through normal wear and tear, spark plugs, distributor caps, rotors, spark plug wires, etc., become less efficient and prone to failure. One early warning sign of the need for a tune-up is a drop in gas mileage.

2. Check your antifreeze. Pour in more coolant if needed and if there is rust in your coolant, drain the radiator and refill with fresh antifreeze. An expert at the Fram Corporation advises the coolant level be checked often, but only when the engine is cold.

3. Change to a multi-viscosity oil, such as 10 W-30 or 10 W-40, to make sure the oil is thin enough to lubricate the engine effectively.

4. Change your oil filter if it is dirty or clogged. Oil

SPARK PLUGS, filters and other engine parts should be checked regularly.

bypassing a clogged filter will not be cleaned and dirty oil doesn't lubricate as effectively as clean oil. In warm climates, oil is subject to the same dirt and clogging problems. Oil changes should be done more frequently if you do a lot of stop and go driving or trailer towing, or make many short trips around town. If you don't put a lot of miles on your car, the oil and filter should be changed at least every six months.

Even if you live in a bitter cold area, knowing your car has been winterized will give you a warm feeling.

IT'S THE MOST

Many people think of the U.S. as a country of giant corporations employing thousands of workers and grossing millions, if not billions, in sales. They're wrong. According to the Federal government, 96.7 percent of all U.S. businesses are small businesses.

• • •

More and more small businessmen are discovering that the most efficient way to do bookkeeping and inventory control is with a small computer, like Radio Shack's TRS-80. Sold at Radio Shack outlets across the country, the low-cost, desk-top unit with a 12" video display, can also make it easier and less time-consuming to cope with many other essential routine jobs.

Why is there never enough time to do it right but always enough time to do it over?

ACHS Coed-Hi-Y Meets

The ACHS Coed-Hi-Y Club met Jan. 3, 1979 in the school library. Sabrina Richardson, vice president, opened the meeting in the absence of our president, Jean Thomas read the 13th chapter of Corinthians from the Bible, and led us in prayer. In the absence of our secretary, the minutes and treasurer's report were dispensed with.

There was no old business. A letter of thanks was read to the club. This letter was to thank us for sending the boys in the Patrick Henry Boys' Home Christmas presents.

The order of new business was brought to the attention of the club by Mrs. Jones. She suggested to make posters to go around the school concerning good scholarship since exams are scheduled for next week. The club agreed on the project.

The program was working on the posters.

The meeting was adjourned by the ringing of the school bell.
